Game Statistics

Observe the soccer game and keep tallies of shots on goal, goals, saves and assists for the Huskies. It is much easier to develop a table in Word or Excel with the girl's roster and four columns listed above. Bring the stat sheet and a clipboard to each game, record the stats and send them to the game summary writer.

Shot on Goal - requires the opposing goalkeeper to prevent the ball from entering the goal or a shot that misses wide or high by a just a few feet. (A shot that goes 12 feet over the crossbar is not a shot on goal. A shot where the goalkeeper comes up to retrieve a slow roller is not a shot on goal.)

Save - goalkeeper must make a play that stops a potential goal. (The goalkeeper must touch the ball to prevent the goal in order to be scored a save.)

Assist - a pass by a player which helps a teammate to score a goal.
